– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. **Group I (i.e., Claims 1-5, 6-9, and 10-15)** is drawn to an information processing device and method having a *first storage means* and *second storage means* capable of storing data; and connection means for enabling the information processing device to be connected to an external device that is separate from the information processing device; and prevention means for preventing external devices connected to the connection means from accessing the first region of the storage means (i.e., noted that Group I is particularly directed the *first storage means* and *second storage means* of the information processing device and method thereof), classified in class 348, subclass 231.
 - II. **Group II (i.e., Claims 16-10, 20 and 21)** is drawn to an information processing device having photography means; processing means; *first connection means* for connecting the information processing device to a first external device that supplies power to the information processing device through the first connection means; *second connection means* for connecting the information processing device to a second external device that supplies power to the first information processing device through the second connection means; wherein the first connection means is connected to the first external device, the second connection

means is prevented from being connected to the second external device, and when the second connection means is connected to the second external device, the first connection means is prevented from being connected to the first external device (i.e., noted Group II particularly to *the first connection means* and *the second connection means* of the information processing device and their usages thereof), classified in class 348, subclass 207.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions in Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions in the above groups have respectively separate utility such as those indicated by the different limitations as outlined in the respective grouping of the different claimed invention as illustrated above. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their *different classification*, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II (i.e., noted that Group II is mutually exclusive from Group I), restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aung S. Moe whose telephone number is 703-306-3021. The examiner can normally be reached on Mon-Fri (9-5).
